```rust
pub fn read_blocks_nb(
    ...
) -> Result<u16> {
    *req = BlkReq {In, ...};
    let token = queue.add(
        &[req],
        &mut [buf, resp]
    )?;
    if queue.should_notify() {
        transport.notify(QUEUE);
    }
    Ok(token)
}
```

```rust
pub fn complete_read_blocks(...,
    token: u16,
) -> Result<()> {
    queue.pop_used(
        token,
        &[req],
        &mut [buf, resp]
    )?;
    ...
}
```
