```rust
pub fn flush(...

) -> Result {
  if negotiated_features
  .contains(FLUSH) {

    request(
      BlkReq {

        type_: Flush,...}

    )
  } else {...}

}
```

```rust
pub fn read_blocks(...,

  buf: &mut [u8]

) -> Result {

  request_read(

    BlkReq {

      type_: In,...},

    buf

  )

}
```

```rust
pub fn write_blocks(...,

  buf: &[u8]

) -> Result {
  if !negotiated_features

  .contains(RO) {

    request_write(

      BlkReq {

        type_: Out,...},

      buf

    )
  } else {...}

}
```
